

A long time in the making, the Achtung Camper Motorhome has without a doubt the most thought-through layout on the market.

We've put our heads together with tiny-home architecture firm Winter Architecture and came up with a 6 metre motorhome that carries 3 passengers + driver, has a 1.95 x 1.7 metre sized bed(!) that's always made up, will take you off road and has all the comforts of home plus more. What's more, it has 2 separate seating/eating areas, and that's just on the inside!

The Achtung Camper Volkswagen Crafter Motorhome utilises the most innovative features and accessories on the market.

The diesel run hot water system, heater (with outlets in bathroom and living area) and cook top mean no need for external power and no gas. You're also powered by a 110 amp Lithium battery and the option of a massive 290 watt(!) slimline solar panel on the roof.

Talking about power – we've done some research, and it turns out 2700 kelvins is the optimum 'colour temperature' for a warm, relaxed atmosphere. Lucky we were able to source our favourite touch on/off, dimmable LED light strips in just the right colour!

This van has an 80 litre fridge with freezer in the kitchen area and an extra hidden 20 litre drawer fridge accessible from inside or outside the van so you never run out of cold drinks, wherever you are sitting!

Want to be truly self-sufficient? Not possible when you need a 'dump point' every 3 days. The Solution: Innovative Nature Head Composting Toilet. No dump points, no messy emptying. With this Composting Toilet you only need to empty the container into standard compost or outside in nature (seriously!) every 3 weeks. And NO SMELLS – we promise!

Our motorhomes are licensed to carry 3 passengers plus the driver. Sleep 2 in the back on one of the 2 LARGE size bed options plus the option of sleeping a third person in the front cockpit area (with privacy curtain).

Loads of comfortable lounge seating in the back and a massive 1950x1700 size bed with the option of an electric bed in the roof (still 1950x1700) if you can't be bothered making up your bed at night. Just press the button and down it comes!
